I'm receiving a strange error, the error is: Uncaught ReferenceError: withProps is not defined at this line of code in my App.js file, import React, { Component } from "react"; class App extends Component { withProps(props, callback) { return callback(this, props); } render() { //Render code } } export default App; I'm not really sure what that error means, what exactly is the withProps function? A: You missed an s class App extends Component { withProps(props, callback) { return callback(this, props); } render() { //Render code } } export default App; Edit: You also missed, this and you're using React 16. This should be export default App; The Pathology Core will be organized in the Center for Microbiology. The specific aims are to: 1) to support, in a cost-effective and timely manner, the investigations of the projects in the Center for Microbiology; and 2) to maintain and distribute monoclonal antibodies and clinical specimens, including monoclonal antibodies developed in the Center for Microbiology. Specific activities of the Pathology Core will include: a
